Form letter and Data Table for Mailing to Contractors

There are 219 distinct contractors (vendors) who will be sent printed packets.
They collectively manage 439 projects through 965 contracts whose status may be PENDING, ISSUED, COMPLETE , or which have been CLOSED for less than one year.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services

rendered or goods received) in FY 2004 or earlier (prior to September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are

anticipated for the contract work, put "Done" in this column. If the best estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the

best source of information for these estimates. As mentioned in a previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

Project Number COTR	Contract Number (Release)	Contract Title	Status and Date	Accrual Performance Period	Estimated Accrual Amount
200301700 MCCLINTOCK	00018223 ( )	2003-017-00 INTEGRATED STATUS & EFFECTIVENESS MONITORING	ISSUED 06/23/2004		

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

ASTORIA OR 97103

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

DAYTON WA 99328-1327

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

COLUMBIA LAND TRUST (VANCOUVER)
1351 OFFICERS ROW
VANCOUVER WA 98661

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. In reply refer to: KEWB-4

CONFEDERATED TRIBES OF THE (NESPELEM)
COLVILLE RESERVATION
PO BOX 150
NESPELEM WA 99155

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

KASLO BC VOG1MO

Project Number COTR	Contract Number (Release)	Contract Title	Status and Date	Accrual Performance Period	Estimated Accrual Amount
200304800 WEINTRAUB	00008772 (00003)	HABITAT IMPROVEMENT PROGRAMMATIC BA/BO	CLOSED 10/21/2003		
199604000 HERMESTON	00003138 (00001)	1996-040-00 COHO RESTORATION MID-COLUMBIA RIVER TRIBUTARIES-YIN	ISSUED 12/31/2001		

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

D J WARREN & ASSOCIATES INC (PHILOMATH (SERVICE VENDOR))
PO BOX 1511
PHILOMATH OR 97370

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

DON WILTON SURVEYING (YAKIMA)
2002 ENGLEWOOD #D
YAKIMA WA 98902
Attn: DON WILTON

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

SELAH WA 98942

Project Number COTR	Contract Number (Release)	Contract Title	Status and Date	Accrual Performance Period	Estimated Accrual Amount
199405900 BRADY	00015300 ( )	1994-059-00 YAKIMA BASIN EVIRONMENTAL EDUCATION PROGRAM	ISSUED 09/26/2003		

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

SEATTLE WA 98121

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. Contract Accruals for Work Performed but Not Billed Through September 30, 2004
For Fish and Wildlife Contracts with the Bonneville Power Administration

GARDENA FARMS IRRIGATION DISTRICT #13 (TOUCHET)
539 WHITE RD
TOUCHET WA 99360

Project Number COTR	Contract Number (Release)	Contract Title	Status and Date	Accrual Performance Period	Estimated Accrual Amount
199601100 BRANUM	00007402 ( )	1996-011-00 O & M FOR BURLINGAME SCREENS & LADDER	ISSUED 11/05/2001		

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

PO BOX 106
CONDON OR 97823

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

LA GRANDE OR 97850

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

Project Number COTR	Contract Number (Release)	Contract Title	Status and Date	Accrual Performance Period	Estimated Accrual Amount
199303501 KEEN	00004478 ( )	1993-035-01 RED RIVER RESTORATION	ISSUED 04/26/2001		

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

IDAHO SOIL & WATER CONSV COMM (BOISE)
STATE OF IDAHO DEPT OF AGRICUL
PO BOX 790
BOISE ID 83701

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Attn: KEN GOODNO

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

199802100 YARDE	00000452 (00002)	HOOD RIVER FISH HABITAT PROJECT	ISSUED 04/17/2001		

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

HILLSBORO OR 97124

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

Project Number COTR	Contract Number (Release)	Contract Title	Status and Date	Accrual Performance Period	Estimated Accrual Amount
200304800 STEWART	00008774 (00003)	SPECIES LIFE HISORY AND DISTRIBUTION SECTION FOR USFWS	ISSUED 08/02/2004		
198605000 SPIERING	00000326 (00008)	WRITER-EDITOR SERVICES FOR WHITE STURGEON ENVIRONMENTAL ASSESSMEN	COMPLETE 01/14/2003		

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

KALISPEL TRIBE OF INDIANS (USK)
PO BOX 39
USK WA 99180
Attn: LORAIN WOOD

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

KELLY TEMPORARY SERVICE (PORTLAND (SERVICE VENDOR))
1212 SOLUTIONS CENTER
CHICAGO IL 60677

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

Attn: CAROLYN STAMEY

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. KRUGEL & ASSOCIATES (KRUGEL & ASSOCIATES)
2967 N WILLAMETTE BLVD
PORTLAND OR 97217

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

NEZ PERCE ID 83543-0237

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

MERIDIAN ENVIRONMENTAL INC (SEATTLE)
1900 N NORTHLAKE WAY #211
SEATTLE WA 98103

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**

It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

HELENA MT 59620

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

PORTLAND OR 97232

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

NEZ PERCE TRIBE (NEZ PERCE TRIBE)
CULTURAL RESOURCES PROGRAM
PO BOX 365
LAPWAI ID 83540

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

Attn: KATE BORIS-BROWN

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services

rendered or goods received) in FY 2004 or earlier (prior to September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are

anticipated for the contract work, put "Done" in this column. If the best estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the

best source of information for these estimates. As mentioned in a previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

OREGON STATE UNIVERSITY (OR OSU)
PO BOX 1086
CORVALLIS OR 97330

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

Contract Accruals for Work Performed but Not Billed Through September 30, 2004
For Fish and Wildlife Contracts with the Bonneville Power Administration

PACIFIC BIODIVERSITY INSTITUTE (WINTHROP)
PO BOX 298
WINTHROP WA 98862

Project Number COTR	Contract Number (Release)	Contract Title	Status and Date	Accrual Performance Period	Estimated Accrual Amount
200301700 MCCLINTOCK	00016175 (00001)	2003-017-00 INTEGRATED STATUS & EFFECTIVENESS MONITORING	ISSUED 02/02/2004		

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. I certify that the above services were performed on or before September 30, 2004 and that an invoice will

not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

PACIFIC NORTHWEST ELECTRIC POWER & (PORTLAND)
851 SW 6TH AVE
SUITE 1100
PORTLAND OR 97204-1348

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

PACIFIC POWER & LIGHT CO (PENDLETON)
PO BOX 220
PENDLETON OR 97801

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

Contract Accruals for Work Performed but Not Billed Through September 30, 2004
For Fish and Wildlife Contracts with the Bonneville Power Administration

PACIFIC POWER & LIGHT CO (PENDLETON)
PO BOX 220
PENDLETON OR 97801

Project Number COTR	Contract Number (Release)	Contract Title	Status and Date	Accrual Performance Period	Estimated Accrual Amount
198902700 MCCLOUD	00004372 ( )	1989-027-00 PROVIDE ELECTRIC SERVICE TO WEID/SANDLER PUMPING STAT	ISSUED 07/03/2002		

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

PARAMETRIX INC (PORTLAND)
PO BOX 460
SUMNER WA 98390

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

Phone: (206) 527-8991

Project Number COTR	Contract Number (Release)	Contract Title	Status and Date	Accrual Performance Period	Estimated Accrual Amount
199800100 SKIDMORE	00004031 ( )	1998-001-00 SUPPORT - PATH/ESA BIOLOGY ASSESSMENTS	ISSUED 03/20/2001		

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

200300600 WILCOX	00013743 ( )	2003-006-00 EFFECTIVE MONITORING CHINOOK RIVER ESTURAY RESTOR	ISSUED 05/09/2003		

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

SEATTLE MARINE & FISHING SUPPLY CO INC (SEATTLE)
PO BOX 99098
SEATTLE WA 98199

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

PO BOX 405
MORO OR 97039

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Attn: ALICIA PARADISE

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.
2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual

estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004: $XX.xx
Work on or before September 30, 2004: $YY.yy
(This includes the above June 30 amount.)

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time

consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

200105900 KIRKMAN	00006602 ( )	2001-059-00 SPRING/SUMMER CHINOOK & STEELHEAD OUTPLANTING M&E	CLOSED 10/10/2003		
200207100 SKIDMORE	00010855 ( )	2002-071-00 DEVELOPMENT OF A COMPREHENSIVE MARKING PLAN	CLOSED 10/11/2003		

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

SPOKANE TRIBE OF INDIANS (SPOKANE TRIBE OF IND)
PO BOX 100
WELLPINIT WA 99040
Attn: Carol Evans

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

WAUCONDA WA 98859

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

UNDERWOOD CONSERVATION DIST (WHITE SALMON)
170 NW LINCOLN
WHITE SALMON WA 98672

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services

rendered or goods received) in FY 2004 or earlier (prior to September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are

anticipated for the contract work, put "Done" in this column. If the best estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the

best source of information for these estimates. As mentioned in a previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services

rendered or goods received) in FY 2004 or earlier (prior to September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are

anticipated for the contract work, put "Done" in this column. If the best estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

199801900 BAUGHER	00006033 ( )	1998-19-00 WIND RIVER WATERSHED	ISSUED 08/03/2001		

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

Attn: OPAC

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services

rendered or goods received) in FY 2004 or earlier (prior to September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are

anticipated for the contract work, put "Done" in this column. If the best estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the

best source of information for these estimates. As mentioned in a previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the

best source of information for these estimates. As mentioned in a previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

199202601 WELCH	00006249 ( )	2000-061-00 UPPER WILDCAT & JOSEPH CREEK WATERSHED IMPROVEMENT	COMPLETE 01/02/2004		

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

Project Number COTR	Contract Number (Release)	Contract Title	Status and Date	Accrual Performance Period	Estimated Accrual Amount
200103600 SKIDMORE	00007540 ( )	2001-36 AMES CREEK RESTORATION	COMPLETE 08/10/2004		

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

SPOKANE WA 99201-2348

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

rendered or goods received) in FY 2004 or earlier (prior to September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are

anticipated for the contract work, put "Done" in this column. If the best estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the

best source of information for these estimates. As mentioned in a previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

Project Number COTR	Contract Number (Release)	Contract Title	Status and Date	Accrual Performance Period	Estimated Accrual Amount
200101500 LOFY	00015240 ( )	PI-200101500 ECHO MEADOWS PRODUCT REVIEW- USGS	COMPLETE 04/14/2004		

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

U.S. FISH & WILDLIFE SERVICE (LEAVENWORTH)
7501 ICICLE RD
LEAVENWORTH WA 98826

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

WASHINGTON DEPT OF FISH & WILDLIFE (OLYMPIA)
600 N CAPITAL WY
OLYMPIA WA 98501

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

WASHINGTON DEPT OF FISH & WILDLIFE (OLYMPIA)
600 CAPITAL WAY N
OLYMPIA WA 98501-1091

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

WALLOWA COUNTY (WALLOWA COUNTY)
101 S RIVER RM 202
ENTERPRISE OR 97828

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

ENTERPRISE OR 97828

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

CONFEDERATED TRIBES OF WARM SPRINGS (WARM SPRINGS TRIBE)
PO BOX C
WARM SPRINGS OR 97761

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

August 24, 2004

In reply refer to: KEWB-4

WESTLAND IRRIGATION DISTRICT (ECHO)
PO BOX 944
HERMISTON OR 97838

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

200205700 MCCLOUD	00015779 ( )	PI 2002-057-00 WESTLAND-RAMOS: PASSSAGE/HABITAT REST.	ISSUED 11/04/2003		

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

SUITE B
BAINBRIDGE ISLAND WA 98110

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

THE DALLES OR 97058

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

THE XERCES SOCIETY (PORTLAND)
4828 SE HAWTHORNE BLVD
PORTLAND OR 97215

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. YAKAMA NATION FISHERIES PROJECT (TOPPENISH)
PO BOX 151
TOPPENISH WA 98948
Attn: RACHEL CASTILLEJA

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

199604000 HERMESTON	00016988 ( )	1996-040-00 MID COLUMBIA COHO RESTORATION	ISSUED 03/24/2004		

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

It is once again time for me to ask for your assistance in accounting for the financial performance on Fish and Wildlife contracts. It has only been three months since I last asked for you to make accrual estimates for our simulated year-end closing that took place on June 30, 2004, so I realize that we have placed a burden on your staff to provide us with this information twice in one year. However, the year-end accrual estimate is important as it ensures that we accurately record expenses in the appropriate fiscal year, thus creating clarity between the work accomplished in FY 2004, with applicable expenses, and the work accomplished in FY 2005. This distinction is particularly important in light of BPA's need to closely manage the Fish and Wildlife Program within accrual limits, and the heightened standards of reporting of financial assets and liabilities recommended by our independent auditor, PriceWaterhouseCoopers. Accurate accrual estimates will provide an opportunity to determine to what extent unspent funds from FY 2004 may be used in FY 2005.

To accurately capture FY 2004 Fish & Wildlife Program costs, BPA is requesting your assistance in identifying a detailed listing of all contract work and expenses that meet the following criteria. Note that **both** of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance (services rendered or goods received) in FY 2004 or earlier (prior to

September 30, 2004). If you ordered goods before September 30, but anticipate that they will not be received until after September 30, these are costs of FY 2005, not FY 2004.

2. The invoice for the contract performance in question will not be received by BPA prior to the close of business on September 30, 2004. The work will be invoiced in the first few months of FY 2005.

Again, if either of the above criteria is not true, then an accrual should be reported as $0. **If you have costs from the June accrual estimate that have not been billed to BPA by September 30, please include those costs in the September 30 accrual estimate.** Do not double count expenses by including costs in the accrual estimate that have already been billed to BPA or will be before September 30th, or including expenses for work or goods expected to take place or be received after September 30. These costs will be invoiced and included in FY 2005.

Please include in your accrual estimate any indirect costs and any subcontractor costs that will be incurred but not billed before September 30, 2004. **The accrual estimate should be less than the contract balance anticipated as of September 30, 2004 and should not result in the spending cap identified in your contract being exceeded.** Please be as accurate as possible in making the accrual estimate. The accuracy of your best estimate of the accruals is extremely important, as our auditors (PriceWaterhouseCoopers) will be reviewing these estimates during their audit of BPA. PriceWaterhouseCoopers or BPA internal auditors may request additional information for contracts that accrue significantly over or under their actual expenditures to determine the causes of inaccuracies.

In order to facilitate uniform reporting, please indicate the accrual estimate for each contract listed on the attached form. **If you have a contract that meets the criteria listed above, but is not listed, please add it to the form.** This year we've included a column that shows the status of the contract. If the contract status is closed, there may be a few instances where BPA has not received the final invoice and an accrual estimate is needed. If the contract is done and no more invoices are anticipated for the contract work, put "Done" in this column. If the best

estimate is that no expenditures will take place before September 30th, but you are not sure, and there "may be" additional invoices, indicate $0. **If separate invoices will be submitted for multiple performance periods on a contract, please provide an estimate for each individual invoice and the period it will cover.** For example, if you anticipate submitting an invoice for the month of August 2004 and an invoice for September 2004, list each of these performance periods and the corresponding estimate of the invoice amount. The performance period for an invoice is the period of time when the invoiced work is performed or when goods will be received. Accurately indicating the performance period will allow BPA to match the accrual estimate to the actual invoice when it is submitted. **To help us match the actual invoice to the accrual estimate for invoices received after September 30th, please indicate on the invoice or transmittal letter, that portion of the invoice that relates to work performed and label each:**

Work on or before June 30, 2004:	**$XX.xx**
Work on or before September 30, 2004: (This includes the above June 30 amount.)	**$YY.yy**

We are asking for the breakout of pre-June 30th costs as we are still tracking invoices against those accrual estimates. We are no longer tracking costs from the September 30, 2003 accruals.

Please return the completed and signed form to BPA, ATTN: KEWB-4/Accrual Estimates, by September 10, 2004. The form may be faxed to BPA at (503) 230-3049, however we request that the original form still be mailed to BPA. Your attention to detail and cooperation is essential and appreciated. Reports that show which invoices have been received for each contract are available at the following location on the BPA website to assist you in calculating your accrual estimate:

http://www.efw.bpa.gov/cgi-bin/FW/Info_For_Fish_Wildlife_Contractors.cgi

BPA realizes that preparing the accrual estimates twice this year is time consuming for our contractors, however at this point in time, you are the best source of information for these estimates. As mentioned in a

previous letters to contractors, with the Process Improvement project under way at BPA, including the development of our new project management system Pisces, we will be phasing in a requirement for monthly spending plans for contracts beginning or renewing October 1, 2004. We are hoping that these monthly spending plans will be accurate enough that at the end of FY 2005, we can use these plans to calculate the year-end accruals, thus eliminating the need to ask our contractors for this information. We will be asking our contractors to review the estimates that we make for the first couple of years to help us ensure that our methodology is producing an accurate estimate.

Once again, I recognize the burden that calculating these estimates places on your staff and would like to thank you in advance for cooperating with us in ensuring that the numbers reported for the Fish and Wildlife program are the best that they can be. If you have questions, please contact Tracy Hursh at (503) 230-4532 or Patty Baltazar at (503) 230-4760.

Sincerely,

Scott R. Hampton

I certify that the above services were performed on or before September 30, 2004 and that an invoice will not be submitted to BPA for payment by September 30, 2004.

All of the following criteria must be met before an accrual may be processed for unbilled contract performance:

1. There must have been actual contract performance prior to October 1, 2004.
2. The invoice will not be received by BPA by close of business on September 30, 2004.

Again, if either of the above criteria is not true, then an accrual should not be reported.

Since All the above conditions have been met, these expenditures should be accrued.

Signed
