3	Remedial Actions Required at Leaburg Fish Hatchery - Summer Steelhead
4	Adult Contribution to Fisheries, Spawning Grounds and Hatcheries: Leaburg Fish Hatchery - Summer Steelhead

5 Annual Operating Expenses: Leaburg Fish Hatchery - Summer Steelhead

6 Annual Operating Expenses - Leaburg Fish Hatchery

Executive Summary

This report presents the findings of the independent audit of the Leaburg Fish Hatchery - Summer Steelhead program. The hatchery is located along the McKenzie River (Willamette Basin) approximately 23 mile east of Springfield Oregon. The hatchery is used for adult collection, incubation and rearing of summer steelhead.

The audit was conducted in 1996-1997 as part of a 2-year effort that will include 67 hatcheries and satellite facilities located on the Columbia and Snake River system in Idaho, Oregon, and Washington. The hatchery operating agencies include the U.S Fish and Wildlife Service, Idaho Department of Fish and Game, Oregon Department of Fish and Wildlife, and Washington Department of Fish and Wildlife.

Background

The audit is being conducted as a requirement of the Northwest Power Planning Council (NPPC) Strategy for Salmon and the Columbia River Basin Fish and Wildlife Program. Under the audit, the hatcheries are evaluated against policies and related performance measures developed by the Integrated Hatchery Operations Team (IHOT). IHOT is a multi-agency group established by the NPPC to direct the development of new basinwide standards for managing and operating fish hatcheries. The Bonneville Power Administration (BPA) contracted with Montgomery Watson to act as an independent contractor for the audit.

IHOT has established five basic policies that cover: (1) hatchery coordination, (2) hatchery performance standards, (3) fish health, (4) ecological interaction, and (5) genetics. The audit focuses on all these policies, with the exception of hatchery coordination. These policies are set forth in *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries (IHOT 1995)*. That document is the source for the performance measures that are the basis of this audit.

The Audit Process

The audit was based on the facility management's response to a 109-page questionnaire. This audit form was completed through a five-step process in which:

- Information was obtained from headquarters.
- The hatchery manager was asked to fill out and return the audit form.
- A 1-2 day site audit visit was conducted to inspect facilities, review hatchery records, discuss audit form responses, and develop remedial action plans.
- A compliance report was developed to document the compliance status of each performance measure. This report was then shared with the hatchery manager and IHOT representative.
- This hatchery evaluation report was written to document compliance with IHOT performance measures and develop cost estimates for remedial actions when needed.

Leaburg Fish Hatchery - Summer Steelhead Results

The Leaburg facility includes 2 raceways for adult holding, 42 concrete raceways, 6 circular rearing ponds, 17 fiberglass Canadian troughs, and incubation facilities. The hatchery was

constructed in 1953 by the U.S. Army Corps of Engineers to mitigate for lost trout habitat caused by construction of Blue River and Cougar Dams and other Willamette Valley projects.

The Leaburg Fish Hatchery - Summer Steelhead program was in general compliance with most of the performance measures. In the area of program objectives, the hatchery did not have a Monitoring and Evaluation Plan and needed to conduct a fisheries contribution study. The audit found that the hatchery was not in compliance with the water quality monitoring, alarm, food storage, and release facilities requirements, which are all facilities requirements. The hatchery was not meeting all the transportation protocols, and needed to develop a smoltification goal and monitoring program. The hatchery did not have a Genetics Monitoring and Evaluation Program.

The specific areas in which the Leaburg Fish Hatchery - Summer Steelhead program requires remedial actions based on the IHOT performance measures are listed below. These remedial actions are listed in alphabetical order without intent of ranking or otherwise assigning priority:

- Conduct fish contribution study
- Conduct IHOT QA/QC tests for feed preparation
- Construct a new 4'W x 6'H x 100'L outlet channel
- Develop alarm log
- Develop approved genetics M&E plan
- Develop hatchery M&E plan to track Leaburg fish
- Develop smoltification goal and monitor
- Follow IHOT protocols for disinfection of transport vehicle interior and exterior
- Follow IHOT protocols for disinfection of transportation equipment and personnel before and after use
- Follow IHOT protocols for removing moist pellets just prior to feeding
- Follow IHOT protocols for tempering of liberation water prior to release
- Follow IHOT requirements for checking of the other alarms weekly
- Install security alarms
- Lower density by splitting fish to other ponds prior to release
- Monitor DO and TGP and record

- Run analysis for water chemistry parameters, turbidity, alkalinity, hardness, nitrite, and contaminants

Non-compliance issues resulting from items beyond human control or Performance Measures not relevant to this hatchery (Type 1 in Table 3, Section 4 of this report) were not listed above.

Facility Description

Name: Leaburg Fish Hatchery
Stock/Species: Summer Steelhead
Operating Agency: Oregon Department of Fish & Wildlife
Funding Agency: Corps of Engineers
Location: The hatchery is located along the McKenzie River (Willamette Basin) approximately 23 miles east of Springfield Oregon.
Address: 90700 Fish Hatchery Road
Leaburg, OR 97489

Hatchery Manager: Mr. Stephen Wells
Phone: (541) 896-3294
Fax: (541) 896-0447

Purpose: The hatchery was constructed in 1953 by the U.S. Army Corps of Engineers to mitigate for lost trout habitat caused by construction of Blue River and Cougar Dams and other Willamette Valley projects. The goal of the hatchery is to help achieve an average sport catch of 1,200 adult summer steelhead in the McKenzie River.

Production Goal: **Summer Steelhead**
Produce 108,000 smolts (24,000 lb) for release into the McKenzie River

Produce 115,500 smolts (11,550 lb) for transfer to Dexter Pond
Water Supply: Water rights total 56,100 gpm from the McKenzie River. All rearing facilities use single-pass water.

Facilities:

Adult Holding:	1 concrete raceway for adult capture - 7,320 cf
Incubation:	6 half stack vertical incubators (48 trays)
	5 aluminum troughs - 11 cf each
Early Rearing:	13 Canadian troughs - 64 cf each
	4 Canadian troughs - 84 cf each
Raceways:	3 concrete raceways - 3,660 cf
	39 concrete raceways - 7,320 cf
	(The number of raceways includes those used for adult capture)
Rearing Ponds:	6 circular concrete ponds - 690 cf each
Satellite Facilities:	None

Compliance Status

The hatchery audits are based on compliance with written IHOT performance measures. These performance measures are documented in *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries* (referred to as *IHOT 1995* in this report).

The purpose of the performance measures is to implement new basinwide policies that provide regional guidelines for operating anadromous hatcheries in the Columbia Basin.

The audit focuses on performance measures for IHOT policies that cover (1) hatchery performance standards, (2) fish health, (3) ecological interaction, and (4) genetics. These performance measures are intended to guide hatchery operations once production is established. For that reason, the hatchery operations audit included broodstock collection, spawning, incubation of eggs, fish rearing and feeding, fish release, equipment maintenance and operations, and personnel training. Production priorities are beyond the scope of this audit.

Based on *IHOT 1995*, a detailed 109-page audit form was developed. The audit form divided the performance measures into six major sections along major program and technical criteria areas. Two additional sections (sections 1 and 8) include general information and expenditure information needed for this Hatchery Evaluation Report and blank forms for additional comments. The following is the basic structure of the IHOT audit form:

Section 1 Performance Measures for General Information and Expenditure
Information (PMs General 1-2)

Integrated Hatchery Operations Team (IHOT) 1995. *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries*, Bonneville Power Administration, Portland, Oregon.

Section 2	Performance Measures for Program Objectives (PMs 1-4)
Section 3	Performance Measures for Facility Requirements (PMs 5-15)
Section 4	Performance Measures for Hatchery Practices (PMs 16-25)
Section 5	Performance Measures for Fish Health Policy (PMs 26-34)
Section 6	Performance Measures for Ecological Interactions (PMs 35-38)
Section 7	Performance Measures for Genetics Policy (PMs 39-43)
Section 8	Blank Forms for Additional Comments.

Several performance measures are repeated in various sections of the audit form. These performance measures overlap in *IHOT 1995* and were retained to allow individuals interested in specific portions of the audit (such as Genetics or Fish Health) to determine the compliance status of all performance measures for a given topic in one location. A repeated performance measure is indicated by shaded text.

The Hatchery Audit Process

The hatchery audit will be conducted over a 2-year period that concludes in 1997. At each hatchery, a five-step process was used to complete the overall hatchery audit.

This process consisted of research and onsite visits. The site visit at the Leaburg Fish Hatchery was conducted on January 30, 1997.

The following is the five-step audit process:

1. Information was obtained from headquarters.
2. The hatchery manager was asked to fill out and return the **Audit Form**.

3. A 1-2 day site audit visit was conducted at each hatchery. During that visit an audit team inspected facilities, reviewed hatchery records, discussed audit form responses, and developed remedial action plans when appropriate.
4. During the site visit, the compliance status of each performance measure was discussed with the hatchery manager and IHOT representative. A portion of the Hatchery Evaluation Report was sent to the hatchery manager following the audit visit as a **Compliance Report**. That Compliance Report is Table 2 of this report.
5. Information from steps 1-4 was used to prepare a draft **Hatchery Evaluation Report**. This draft report was submitted to the operating agencies for review of the information used to determine compliance. Based on review and comments, a final Hatchery Evaluation Report was developed. The final report documents the compliance of a particular hatchery with the IHOT performance measures and presents cost estimates to correct any deficiencies.

Compliance Status of Leaburg Fish Hatchery - Summer Steelhead

The following table includes information on life-stages that are held on this facility for some portion of their rearing cycle (Table 1). For multi-facility programs, summary cost and contribution data is presented at the facility where rearing occurs. For the compliance status relating to performance measures that do not occur at this hatchery, please refer to the Hatchery Evaluation Reports for the hatcheries and stocks listed in Table 1. A check mark (✓) indicates that the specific life-stage is held at this facility.

This section documents the compliance status of the Leaburg Fish Hatchery - Summer Steelhead program. Each performance measure is presented in a table taken from the audit form (Table 2).

The compliance status is identified by the following categories:

- **N/A** (not applicable)
- **Yes** (in compliance)
- **?** (unknown; generally due to unavailability of information to determine compliance)
- **No** (not in compliance).

Remedial actions are suggested for performance measures not in compliance. These remedial actions are grouped into categories and listed in Section 4 of this report, where the cost of the required remedial actions is also presented.

Table 1 Summary Program Information for Leaburg Fish Hatchery - Summer Steelhead

Component	Location of Adult Holding, Spawning, Incubation, and Rearing					
	Leaburg Fish Hatchery	South Santiam Hatchery	Oak Springs Hatchery	Dexter Pond		
Adult Collection	4	4				
Adult Holding		4				
Spawning		4				
Fertilization		4				
Incubation						
green-to-eyed		4				
eyed-to-hatch			4			
Rearing						
fry			4			
fingerlings	4			4		
smolts	4			4		
Acclimation/release	4			4		

Table 2 Leaburg Fish Hatchery - Summer Steelhead Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#1	Are the hatchery programs outlined in a subbasin management plan?		4			Columbia Basin System Planning Production Plan and McKenzie subbasin plan	
#2	Is the hatchery operating under a current hatchery operational plan? Is it understood by staff? Is it being followed?		4 4 4			IHOT Operations Plan and Leaburg Operations and Maintenance Manual	
#3	Is a hatchery monitoring and evaluation plan in place? Do you have a written monitoring and evaluation plan?				4	No CWT program for steelhead; all fish are adipose clipped	Develop M&E plan to track Leaburg fish
#4a	Adult contribution to fisheries, spawning grounds, and hatchery		4			Review of records; ODF&W punch-card analysis.	
#4b	Adult pre-spawning survival as compared with established goal	4				Do not hold adults	
#4c	Egg-take as compared with established hatchery goal	4				Do not spawn fish	

Table 2 Leaburg Fish Hatchery - Summer Steelhead Compliance With Performance Measures

		N/A	Yes	?	No	
#4d	Green-egg to eyed-egg survival as compared with established goal	4				Do not incubate eggs
#4e	Eyed-egg to fry survival as compared with established goal	4				Do not incubate eggs
#4f	Fry to smolt survival as compared with established goal		4			Review of records; in compliance 3 out of last 3 years
#4g	Production as compared with established goal		4			Review of records; in compliance 3 out of last 3 years
#4h	Percent survival (smolt to adult) as compared with established goal		4			Review of records; in compliance 3 out of last 3 years; ODF&W punch-card analysis.
#4i	Number of eggs, fry, fingerlings, smolts, and/or adults to meet basinwide needs	4				Review of records/Discussion

Table 2 Leaburg Fish Hatchery - Summer Steelhead Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#5a	Temperature						
	Does your water temperature meet the criteria for spawning?	4				Do not spawn fish	
	Does your water temperature meet the criteria for incubation?	4				Do not incubate eggs	
	Does your water temperature meet the criteria for rearing?		4			Review of records/Discussion	
#5b	Dissolved gases						
	Is the oxygen level near saturation?			4		No data	Monitor DO and record
	Is the dissolved nitrogen level less than saturation?			4		No data	Monitor TGP and record
#5c	Chemistry						
	Ammonia (un-ionized)			4		No data	Run analysis

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#23	Transportation facilities						
	Do transportation equipment and personnel receive disinfection before and after use?				4	Discussion	Follow IHOT protocols for disinfection of transportation equipment and personnel before and after use
	Is the fish tank interior disinfected using a solution of 200 ppm active chlorine for 30 minutes minimum or formaldehyde gas generation method (relative humidity of 60% for 2 hrs)?		4			Discussion	
	Is the exterior of the fish transport vehicle disinfected using high pressure steam (115-130°C), high temperature acid, or with 200 ppm chlorine for 30 minutes?				4	Discussion	Follow IHOT protocols for disinfection of transport vehicle interior and exterior
	Is the fish transport vehicle (cab) disinfected using 600 ppm quaternary ammonia compounds (1.5 ml of 50% stock solution/liter water)?				4	Discussion	See above
	Is other equipment disinfected including fish pumps, nets, egg sorters, waders, boots, rain gear, hoses and other equipment using one of the following solutions?		4			Discussion	

Table 2 Leaburg Fish Hatchery - Summer Steelhead Compliance With Performance Measures

	N/A	Yes	?	No		
200 ppm chlorine for 30 minutes 600 ppm quaternary ammonia compound for 30 minutes 200 ppm iodophor solution for 10 minutes					Discussion	
Do personnel wear protective garments when handling fish eggs or cultural water?		4			Discussion	
Do the fish transport truck/chassis and tank/unit receive an inspection and service prior to the release season?		4			Discussion	
Is a daily service inspection completed before starting up and leaving for the day?		4			Discussion	

Table 2 Leaburg Fish Hatchery - Summer Steelhead Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#23 (cont)	Transportation facilities						
	Does the fish transport unit receive an inspection prior to loading?		4			Discussion	
	Does a pre-loading inspection covering tank water level, pumps or aerators, oxygen injection system settings, displacement gauge, and truck loading/hauling density tables checked and reviewed occur prior to loading fish in the transport unit?		4			Discussion	
	Do hauling criteria include checking the fish 45 minutes to 1 hour after loading?		4			Discussion	
	When fish are active and systems are functioning properly, is the oxygen concentration reduced and maintained at approximately 8 ppm?		4			Discussion	
	Is water temperature in the transportation unit maintained within the 42-48 °F range?		4			Discussion	

Table 2 Leaburg Fish Hatchery - Summer Steelhead Compliance With Performance Measures

	N/A	Yes	?	No		
Do fish releasing procedures include the following criteria?						
Releasing the fish at the correct release site or into the correct water body.		4			Discussion	
Tempering or the difference between the liberation tank and the target water body should not exceed 10°F.				4	Discussion	Follow IHOT protocols for tempering of liberation water prior to release
The liberation hose should be angled so that fish gently hit the water. Using a tripod is a method of ensuring the hose will stay at the proper angle.		4			Discussion

Remedial Actions

Based on the compliance status for each performance measure, remedial actions were developed. The required remedial actions are organized into five categories. The types of categories range across a spectrum from those actions that are beyond human control, to those that require a change in agency policy or procedures, to those that involve a significant capital cost to put in place. The following are the five types of remedial actions identified under phase 1 of the audit:

The Five Types of Remedial Actions

Type	Description
1	Non-compliance issues resulting from items beyond human control or Performance Measures not relevant for this hatchery
2	Remedial actions requiring changes in agency policies or procedures
3	Remedial actions requiring changes in monitoring coverage or interval
4	Remedial actions requiring significant capital expenditures
5	Remedial actions that may require significant capital expenditures but are not clearly definable at this time

Remedial Actions at Leaburg Fish Hatchery - Summer Steelhead

This section presents the corrective actions required to bring the Leaburg Fish Hatchery - Summer Steelhead program into compliance with IHOT performance measures. The remedial actions suggested here are just that, suggestions developed by the Montgomery Watson Audit Team. For some non-compliance areas, other remedial actions could be proposed. The required remedial actions are cross-referenced to each IHOT performance measure that was not in compliance. Where appropriate, the costs associated with the remedial actions are also presented (Table 3).

The cost estimates presented in this section are based on professional experience from similar projects. In most cases, only a lump-sum figure is presented, and detailed take-off lists have not been prepared. The cost estimates are essentially order of magnitude estimates ($\pm 40\%$).

More importantly, the suggested remedial activities may also present several levels of action. Optional actions have been listed for several problems. These optional actions are desirable for either operational or safety considerations.

**Table 3. Remedial Actions Required at Leaburg Fish Hatchery - Summer
Steelhead**

Remedial Action Required	Cost	PMS¹
Type 1 - Non-compliance issues resulting from items beyond human control or Performance Measures not relevant for this hatchery None	---	
Type 2 - Remedial actions requiring changes in agency policies or procedures		
Develop hatchery M&E plan to track Leaburg fish	---	3
Follow IHOT requirements for checking of the other alarms weekly	---	6
Develop alarm log	---	6
Conduct IHOT QA/QC tests for feed preparation	---	12
Follow IHOT protocols for removing moist pellets just prior to feeding	---	12
Develop smoltification goal and monitor	---	22a1
Lower density by splitting fish to other ponds prior to release.	---	22a2
Follow IHOT protocols for disinfection of transportation equipment and personnel before and after use	---	23
Follow IHOT protocols for disinfection of transport vehicle interior and exterior	---	23
Follow IHOT protocols for tempering of liberation water prior to release	---	23
Conduct fish contribution study	---	24
Develop approved genetics M&E plan	---	43
Type 3 - Remedial actions requiring changes in monitoring coverage or interval		
Monitor DO and TGP and record	---	5b
Run analysis for water chemistry parameters, turbidity, alkalinity, hardness, nitrite, and contaminants	---	5c-5g

Remedial Action Required	Cost	PMs ²
Type 4 - Remedial actions requiring significant capital expenditures		
Install security alarms	\$15,000	6
Construct a new 4' W x 6' H x 100' L outlet channel	\$150,000	13
Type 5 - Remedial actions that may require significant capital		
expenditures but are not clearly definable at this time		
None	---	

Hatchery Contribution to Fisheries, Spawning Grounds, and Hatcheries

This section presents the audit findings for the Leaburg Fish Hatchery - Summer Steelhead program contribution of adult fish to fisheries, local fisheries, spawning grounds, and hatcheries. Data is reported by broodyear. A broodyear refers to the adult contribution from the eggs produced from a single group of spawning adults. For some species, this may include fish caught as 2-, 3-, 4-, 5-, and 6-year old fish. Because of the return distribution and data processing delays, the complete adult contribution for a given broodyear may not be available until 4 to 5 years after the fish have been released from the hatchery.

**Table 4. Adult Contribution to Fisheries, Spawning Grounds, and Hatcheries:
Leaburg Fish Hatchery - Summer Steelhead**

Year	Fisheries (Broodyear)	Spawning Grounds ¹ (Broodyear)	Hatchery ¹ (Broodyear)	Total Combined Contribution (Broodyear)	Smolt to Adult Survival (percent)
1981					
1982					

Data obtained from Missing Production Groups Annual Report or from the Regional Mark Information System database.

Total combined adult contribution; presented when it is not possible to subdivide the contribution into fisheries, spawning grounds, and hatchery contributions.

1983

1992	2,942	---	148	3,090	2.87

Annual Operating Expenditures

The level and detail of annual operating expenditures varies widely depending on hatchery, operating agency, and funding source. When provided, expenditures were presented in terms of personnel costs, operating costs (power, feed, supplies), capital costs, indirect costs charged to the federal government, third-party costs, and other costs. These cost components were summed to determine a total hatchery annual cost. Based on discussion with the hatchery manager, the percent of total hatchery costs allocated to a given program was estimated. The total hatchery costs and the percent of hatchery costs allocated to a given program were used to compute the cost of a given program. Table 5 shows the annual operating expenses for the Leaburg Fish Hatchery - Summer Steelhead program. For programs that occur at more than one facility (as shown on Table 1 in Section 3 of this report), the cost breakdown for the component(s) at each facility is presented in separate tables (Tables 5a, 5b, and 5c).

Table 5. Annual Operating Expenses: Leaburg Fish Hatchery - Summer Steelhead

Hatchery	1993	1994	1995
1. Leaburg Hatchery	\$91,085	\$100,685	\$102,327
