5	Annual Operating Expenses: North Toutle Hatchery - Coho (Type S)
6	Annual Operating Expenses - North Toutle Hatchery

Executive Summary

This report presents the findings of the independent audit of the North Toutle Hatchery - Coho (Type S) program. The hatchery is located along the Green River about 23 miles east of Castle Rock, Washington. The hatchery is used for adult collection, egg incubation, and rearing of tule fall chinook and early (Type S) coho.

The audit was conducted in 1996-1997 as part of a 2-year effort that will include 67 hatcheries and satellite facilities located on the Columbia and Snake River system in Idaho, Oregon, and Washington. The hatchery operating agencies include the U.S Fish and Wildlife Service, Idaho Department of Fish and Game, Oregon Department of Fish and Wildlife, and Washington Department of Fish and Wildlife.

Background

The audit is being conducted as a requirement of the Northwest Power Planning Council (NPPC) "Strategy for Salmon" and the Columbia River Basin Fish and Wildlife Program. Under the audit, the hatcheries are evaluated against policies and related performance measures developed by the Integrated Hatchery Operations Team (IHOT). IHOT is a multi-agency group established by the NPPC to direct the development of new basinwide standards for managing and operating fish hatcheries. The Bonneville Power Administration (BPA) contracted with Montgomery Watson to act as an independent contractor for the audit.

IHOT has established five basic policies that cover: (1) hatchery coordination, (2) hatchery performance standards, (3) fish health, (4) ecological interaction, and (5) genetics. The audit focuses on all these policies, with the exception of hatchery coordination. These policies are set forth in *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries (IHOT 1995)*. That document is the source for the performance measures that are the basis of this audit.

The Audit Process

The audit was based on the facility management's response to a 109-page questionnaire. This audit form was completed through a five-step process in which:

- Information was obtained from headquarters.
- The hatchery manager was asked to fill out and return the audit form.
- A 1-2 day site audit visit was conducted to inspect facilities, review hatchery records, discuss audit form responses, and develop remedial action plans.
- A compliance report was developed to document the compliance status of each performance measure. This report was then shared with the hatchery manager and IHOT representative.
- This hatchery evaluation report was written to document compliance with IHOT performance measures and develop cost estimates for remedial actions when needed.

North Toutle Hatchery - Coho (Type S) Results

The North Toutle facility includes 1 pond for adult holding, 14 concrete raceways, 2 rearing ponds, and incubation facilities. The hatchery was authorized under the Mitchell Act and began operation as part of the Columbia River Fisheries Development Program - a program to mitigate for fishery losses caused by hydroelectric system development.

The North Toutle Hatchery - Coho (Type S) program was in general compliance with most of the performance measures. In the area of program objectives, the hatchery was not meeting its adult return goal and needed to review its management strategies for transfers that have impacted production. The audit found that the hatchery was not in compliance with the water temperature criteria, water quality monitoring requirements, predation control criteria, pollution control facility requirements, and pathology-free water criteria, which are all facilities requirements. The hatchery was not meeting the flow criteria for the vertical stack incubators and the loading criteria for rearing. The hatchery needed to develop written incubation and rearing standards for the IHOT Operations Plan, a smoltification goal, and smoltification monitoring plan. The hatchery was not meeting all of the alarm, food storage, and sanitation requirements. The hatchery did not have a Genetics Monitoring and Evaluation Program and was not following the IHOT fertilization protocols.

The specific areas in which the North Toutle Hatchery - Coho (Type S) program requires remedial actions based on the IHOT performance measures are listed below. These remedial actions are listed in alphabetical order without intent of ranking or otherwise assigning priority:

- Conduct IHOT QA/QC tests for feed preparation
- Construct pollution abatement facility for hatchery
- Develop alarm log
- Develop approved genetics M&E plan
- Develop smoltification goal and monitor
- Develop written incubation and rearing standards for the IHOT Operations Plan
- Follow IHOT fertilization protocols
- Follow IHOT flow criteria for vertical stack incubators or revise
- Follow IHOT protocols for not leaving buckets of feed or feed containers outside exposed to light or heat
- Follow IHOT protocols for sanitizing rearing vessels after fish are removed and prior to introducing a new fish lot or stock
- Heat 100 gpm of incubation water by 8 °F; chill 100 gpm of incubation water by 3 °F
- Increase DO by aeration

- Install 19,000 sf of new bird netting; replace 128,000 sf of existing bird netting
- Install security alarms
- Install telephone pagers
- Monitor TGP and record
- Provide additional 1,800 gpm of flow for raceways
- Provide flow bypass around adult holding pond to increase flow to earthen pond
- Review management strategy for program with respect to transfers that have adversely impacted production
- Run analysis for water chemistry parameters, turbidity, alkalinity, hardness, nitrite, and contaminants

Non-compliance issues resulting from items beyond human control or Performance Measures not relevant to this hatchery (Type 1 in Table 3, Section 4 of this report) were not listed above.

Facility Description

Name:	North Toutle Hatchery
Stock/Species:	Tule Fall Chinook Coho (Type S)
Operating Agency:	Washington Department of Fish and Wildlife
Funding Agency:	Mitchell Act (NMFS)
Location:	The hatchery is located along the Green River about 23 miles east of Castle Rock, Washington.
Address:	P.O. Box 73 Toutle, WA 98649
Hatchery Manager:	Mr. Mark Johnson
Phone:	(360) 274-7757
Fax:	(360) 274-2256
Purpose:	The hatchery was authorized under the Mitchell Act and began operation as part of the Columbia River Fisheries Development Program - a program to mitigate for fishery losses caused by hydroelectric system development. The hatchery began operating in 1951 but was destroyed in the 1980 eruption of Mount St. Helens. Hatchery operations were reestablished in 1985. The goal of the hatchery is to produce adult fall chinook and coho that will contribute to NE Pacific and Columbia River Basin commercial and sport fisheries.
Production Goal:	<p>Tule Fall Chinook</p> <p>Produce 2,500,000 subyearling tule fall chinook for on-station release</p> <p>Coho (Type S)</p> <p>Produce 1,100,000 yearling Type S coho for on-station release</p>
Water Supply:	Water rights for the hatchery total 26,031 gpm from the Green River.
Facilities:	
Adult Holding:	1 dirt adult holding pond - 18,525 cf

Incubation: 31 deep troughs - 31 cf each
24 8 tray vertical stack incubators - 192 trays

Early Rearing: 31 deep troughs - 31 cf each

Raceways: 14 concrete raceways - 3,650 cf each

Rearing Ponds: None

Satellite Facilities:

Section 3
Compliance Status

The hatchery audits are based on compliance with written IHOT performance measures. These performance measures are documented in *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries* (referred to as *IHOT 1995* in this report).¹ The purpose of the performance measures is to implement new basinwide policies that provide regional guidelines for operating anadromous hatcheries in the Columbia Basin.

The audit focuses on performance measures for IHOT policies that cover (1) hatchery performance standards, (2) fish health, (3) ecological interaction, and (4) genetics. These performance measures are intended to guide hatchery operations once production is established. For that reason, the hatchery operations audit included broodstock collection, spawning, incubation of eggs, fish rearing and feeding, fish release, equipment maintenance and operations, and personnel training. Production priorities are beyond the scope of this audit.

Based on *IHOT 1995*, a detailed 109-page audit form was developed. The audit form divided the performance measures into six major sections along major program and technical criteria areas. Two additional sections (sections 1 and 8) include general information and expenditure information needed for this Hatchery Evaluation Report and blank forms for additional comments. The following is the basic structure of the IHOT audit form:

Section 1	Performance Measures for General Information and Expenditure Information (PMs General 1-2)
Section 2	Performance Measures for Program Objectives (PMs 1-4)
Section 3	Performance Measures for Facility Requirements (PMs 5-15)
Section 4	Performance Measures for Hatchery Practices (PMs 16-25)
Section 5	Performance Measures for Fish Health Policy (PMs 26-34)
Section 6	Performance Measures for Ecological Interactions (PMs 35-38)
Section 7	Performance Measures for Genetics Policy (PMs 39-43)
Section 8	Blank Forms for Additional Comments.

Several performance measures are repeated in various sections of the audit form. These performance measures overlap in *IHOT 1995* and were retained to allow individuals interested in specific portions of the audit (such as Genetics or Fish Health) to determine the compliance status of all performance measures for a given topic in one location. A repeated performance measure is indicated by shaded text.

The Hatchery Audit Process

The hatchery audit will be conducted over a 2-year period that concludes in 1997. At each hatchery, a five-step process was used to complete the overall hatchery audit.

¹Integrated Hatchery Operations Team (IHOT) 1995. *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries*, Bonneville Power Administration, Portland, Oregon.

This process consisted of research and onsite visits. The site visit at the North Toutle Hatchery was conducted on March 19, 1997.

The following is the five-step audit process:

1. Information was obtained from headquarters.
2. The hatchery manager was asked to fill out and return the **Audit Form**.
3. A 1-2 day site audit visit was conducted at each hatchery. During that visit an audit team inspected facilities, reviewed hatchery records, discussed audit form responses, and developed remedial action plans when appropriate.
4. During the site visit, the compliance status of each performance measure was discussed with the hatchery manager and IHOT representative. A portion of the Hatchery Evaluation Report was sent to the hatchery manager following the audit visit as a **Compliance Report**. That Compliance Report is Table 2 of this report.
5. Information from steps 1-4 was used to prepare a draft **Hatchery Evaluation Report**. This draft report was submitted to the operating agencies for review of the information used to determine compliance. Based on review and comments, a final Hatchery Evaluation Report was developed. The final report documents the compliance of a particular hatchery with the IHOT performance measures and presents cost estimates to correct any deficiencies.

Compliance Status of North Toutle Hatchery - Coho (Type S)

The following table includes information on life-stages that are held on this facility for some portion of their rearing cycle (Table 1). For multi-facility programs, summary cost and contribution data is presented at the facility where rearing occurs. For the compliance status relating to performance measures that do not occur at this hatchery, please refer to the Hatchery Evaluation Reports for the hatcheries and stocks listed in Table 1. A check mark (✓) indicates that the specific life-stage is held at this facility.

This section documents the compliance status of the North Toutle Hatchery - Coho (Type S) program. Each performance measure is presented in a table taken from the audit form (Table 2). The compliance status is identified by the following categories:

- **N/A** (not applicable)
- **Yes** (in compliance)
- **?** (unknown; generally due to unavailability of information to determine compliance)
- **No** (not in compliance).

Remedial actions are suggested for performance measures not in compliance. These remedial actions are grouped into categories and listed in Section 4 of this report, where the cost of the required remedial actions is also presented.

Table 1 Summary Program Information for North Toutle Hatchery - Coho (Type S)

Component	Location of Adult Holding, Spawning, Incubation, and Rearing					
	North Toutle Hatchery	Beaver Slough Rearing Pond				
Adult Collection	✓					
Adult Holding	✓					
Spawning	✓					
Fertilization	✓					
Incubation						
green-to-eyed	✓					
eyed-to-hatch	✓					
Rearing						
fry	✓					
fingerlings	✓	✓				
smolts	✓					
Acclimation/release	✓					

Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
	N/A	Yes	?	No		
the hatchery programs outlined in a subbasin management plan?		✓			Columbia Basin System Planning Production Plan and Mitchell Act	
Is the hatchery operating under a current hatchery operational plan?		✓			IHOT Operations Plan	
Is it understood by staff?		✓				
Is it being followed?		✓				
Is a hatchery monitoring and evaluation plan in place?						
Do you have a written monitoring and evaluation plan?		✓			CWT and Missing Production Groups Reports	
Is hatchery contribution to fisheries, spawning grounds, and hatchery		✓			Review of records	
Is hatchery pre-spawning survival as compared with established goal		✓			Review of records; in compliance 4 out of last 4 years	
Is hatchery fry-take as compared with established hatchery goal		✓			Review of records; in compliance 3 out of last 3 years	
Is hatchery parr-egg to eyed-egg survival as compared with established goal		✓			Review of records; in compliance 3 out of last 3 years	
Is hatchery eyed-egg to fry survival as compared with established goal		✓			Review of records; in compliance 2 out of last 2 years	
Is hatchery fry to smolt survival as compared with established goal		✓			Review of records; in compliance 3 out of last 3 years	
Is hatchery production as compared with established goal				✓	Review of records; in compliance 2 out of last 3 years	Review management strategy for program
Is hatchery percent survival (smolt to adult) as compared with established goal				✓	Review of records; in compliance 2 out of last 5 years	Increase adult returns
Is hatchery number of eggs, fry, fingerlings, smolts, and/or adults meet basinwide needs	✓				Review of records/Discussion	

Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
	N/A	Yes	?	No		
Temperature						
Does your water temperature meet the criteria for spawning?				✓	Chill 3,000 gpm by 25°F	None
Does your water temperature meet the criteria for incubation?				✓	Review of records/Discussion	Heat 100 gpm by 8°F Chill 100 gpm by 3°F
Does your water temperature meet the criteria for rearing?				✓	Heat 8,000 gpm by 16°F Chill 8,000 gpm by 28°F	None
Dissolved gases						
Is the oxygen level near saturation?				✓	Review of records/Discussion	Increase DO by aeration
Is the dissolved nitrogen level less than saturation?			✓		Review of records/Discussion	Monitor TGP and record
Chemistry						
Ammonia (un-ionized)			✓		No data	Run analysis
Carbon Dioxide			✓		See above	See above
Chlorine			✓		See above	See above
H			✓		See above	See above
Copper			✓		See above	See above
Hydrogen Sulfide			✓		See above	See above
Iron			✓		See above	See above
Manganese			✓		See above	See above
Turbidity						
Does your turbidity meet the criteria?			✓		No data	Run analysis

Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
	N/A	Yes	?	No		
Alkalinity and hardness						
Does your alkalinity and hardness meet the criteria?			✓		No data	Run analysis
Nitrite						
Does your nitrite meet the criteria?			✓		No data	Run analysis
Pesticide Contaminants						
Aldrin			✓		No data	Run analysis
Dieldrin			✓		See above	See above
Heptachlor			✓		See above	See above
Chlordane			✓		See above	See above
Methoxychlor			✓		See above	See above
Endosulfan			✓		See above	See above
Malathion			✓		See above	See above
Parathion			✓		See above	See above
Pathogens						
What portions of the hatchery have disease-free water?						
Adult holding				✓	Inspection of facilities/Discussion	None
Incubation				✓	Inspection of facilities/Discussion	See above
Early rearing				✓	Inspection of facilities/Discussion	See above
Rearing				✓	Inspection of facilities/Discussion	See above
Others	✓					

Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
	N/A	Yes	?	No		
Alarm Systems						
Do the following areas have alarms?						
Intake		✓			Inspection of facilities/Discussion	
Large rearing ponds and adult holding ponds		✓			Inspection of facilities/Discussion	
Raceway headboxes and rearing ponds		✓			Inspection of facilities/Discussion	
Incubation facilities		✓			Inspection of facilities/Discussion	
Quarantine areas and facilities	✓				No quarantine areas and facilities	
Water treatment systems	✓				No water treatment systems	
Security				✓	Inspection of facilities/Discussion	Install security alarms
Are there outside systems and buzzers in onsite residences?		✓			Discussion	
Are water flow alarms checked daily?		✓			Review of records/Discussion	
Are all other alarms checked weekly?	✓				None	
Is there a log of alarms for emergencies, tests, and maintenance requirements?				✓	Review of records/Discussion	Develop alarm log
Are telephone pagers used?				✓	Discussion	Install telephone pagers
Adult collection and holding facilities						
Do you meet the adult holding criteria?		✓			Review of records/Discussion	

Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
	N/A	Yes	?	No		
Abatement facilities Type 1: <u>Vertical stack</u> Do you have an adequate number of units for the overall program?		✓			Inspection of facilities/Discussion	
Type 2: <u>Deep troughs</u> Do you have an adequate number of units for the overall program?		✓			Inspection of facilities/Discussion	
Trapping facilities Type 1: <u>Raceways</u> Do you have an adequate number of units for the overall program?		✓			Inspection of facilities/Discussion	
Type 2: <u>Earthen pond (400' x 140')</u> Do you have an adequate number of units for the overall program?		✓			Inspection of facilities/Discussion	
Type 3: Do you have an adequate number of units for the overall program?	✓					
Feeding facilities Do you meet the approach velocity criteria?		✓			Inspection of facilities/Discussion	
Are the fish screens regularly cleaned?		✓			Inspection of facilities/Discussion	
Does the screen mesh meet screen opening criteria?		✓			Inspection of facilities/Discussion	
Are rearing containers double screened for fish that should not be released to adjacent water?	✓				Released on station	
Predator control facilities Are your predation control facilities effective?				✓	Inspection of facilities/Discussion	Install 19,000 sf of new bird netting Replace 128,000 sf of existing bird netting

Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
	N/A	Yes	?	No		
d storage facilities and quality control						
Does the storage of dry/semi-moist/moist foods (dry <12%; semi-moist 12-20%; moist >20% moisture) follow food manufacturer's recommendations?		✓			Inspection of facilities/Discussion	
Does a regional quality control officer oversee production procedures and monitor:						
Verification by feed manufacturer that ingredients meet specifications?				✓	Discussion	Conduct IHOT QA/QC tests for feed preparation
Ensure feed does not contain unwanted drugs or other additives?				✓	Discussion	See above
Analyze ingredients contained in the final food product to ensure that feed specifications have been met?				✓	Discussion	See above
Are the foods stored and handled according to the following criteria?						
Moist pellets should not exceed 10°F at point of delivery.	✓				Not used	
Moist pellets should be removed from freezer just prior to feeding.	✓				Not used	
Do not leave buckets of feed or feed containers outside exposed to light or heat.				✓	Discussion	Follow IHOT protocols for not leaving buckets of feed or feed containers outside exposed to light or heat.
Open bags of feed should be fed within 1 to 2 days except when feeding small groups of fish.		✓			Discussion	
Automatic feeder hoppers and bulk storage facilities should be insulated against excessive temperatures (80°F and above).		✓			Discussion	
Release facilities						
Do the release facilities ensure that fish are not subjected to adverse conditions?		✓			Inspection of facilities/Discussion	

Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
	N/A	Yes	?	No		
Water Pollution Abatement Facilities						
Do the pollution abatement facilities meet all federal and state regulations (or good engineering practice)?				✓	No pollution abatement facilities	Construct pollution abatement facilities for hatchery
Are pollution abatement facilities operated correctly?				✓		See above
Transportation Facilities						
Are the transport systems adequate to meet IHOT performance measures for transportation practices?		✓			Inspection of facilities/Discussion	

Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
	N/A	Yes	?	No		
Broodstock selection practices						
Is the donor selection process document attached? (PM #40a)	✓				Existing program; does not apply	
Was the donor selection outline followed in selecting the hatchery broodstock? (PM #40b-c)	✓				Existing program; does not apply	
Spawning practices						
Were the appropriate number of spawners, male/female ratios, and fertilization protocols used? (PM #42c-g)				✓	Review of records/Discussion	See PM #42
Incubation practices						
Are specific incubation standards listed in the hatchery operations plan?				✓	Reviewed IHOT Operations Plan	Develop written incubation standards for the IHOT Operations Plan
Are incubation practices written?				✓	See above	See above
Incubation Type 1: <u>Vertical stack</u> (see PM #8) - do you meet the loading and flow criteria?				✓	Review of records/Discussion	Follow IHOT flow criteria for vertical stack incubators
Incubation Type 2: <u>Deep trough</u> (see PM #8) - do you meet the loading and flow criteria?				✓	See above	Develop written incubation standards for the IHOT Operations Plan

Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
	N/A	Yes	?	No		
ring practices						
specific rearing standards listed in the hatchery operations plan?				✓	Review IHOT Hatchery Operations Plan	Develop specific rearing standards for the IHOT Operations Plan
rearing practices written?				✓	Review Hatchery Operations Plan	See above
rearing Unit Type 1: <u>raceways</u> (20'x80') (see PM #9) Do you meet the density and DI criteria? Do you meet the Loading and FI criteria?		✓		✓	Review of records/Discussion Review of records/Discussion	Provide additional 1,800 gpm of flow
rearing Unit Type 2: <u>Earthen ponds (400'x140')</u> (see PM #9) Do you meet the density and DI criteria? Do you meet the Loading and FI criteria?		✓		✓	Review of records/Discussion Review of records/Discussion	Provide flow bypass around adult holding pond to increase flow to earthen pond
rearing Unit Type 3: (see PM #9) Do you meet the density and DI criteria? Do you meet the Loading and FI criteria?	✓ ✓				Review of records/Discussion Review of records/Discussion	
olt quality						
Do you produce a high quality smolt?		✓			Discussion	

Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
	N/A	Yes	?	No		
Health management practices						
Are the monthly hatchery monitoring visits being conducted? (PM #26)		✓			Review of records/Discussion	
Are the annual broodstock inspections being conducted? (PM #27)		✓			Review of records/Discussion	
Is there pathogen-free water (PM #5h) and are the sanitation procedures being followed? (PM #28)				✓	Review of records/Discussion	See PM #5h and PM #28
Are the following water quality parameters within criteria? (PM #5a-5g)						
Water temperature				✓	Review of records/Discussion	See PM #5a
Dissolved gases				✓	Review of records/Discussion	See PM #5b
Chemistry			✓		Review of records/Discussion	See PM #5c
Turbidity			✓		Review of records/Discussion	See PM #5d
Alkalinity and hardness			✓		Review of records/Discussion	See PM #5e
Nitrite			✓		Review of records/Discussion	See PM #5f
Contaminants			✓		Review of records/Discussion	See PM #5g
Are rearing standards being followed? (PM #19)				✓	Review of records/Discussion	See PM #19
Are egg and fish transfer/release requirements met? (PM #31)		✓			Review of records/Discussion

Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
	N/A	Yes	?	No		
Transportation facilities						
Do transportation equipment and personnel receive disinfection before and after use?	✓				Fish released on station	
Is the fish tank interior disinfected using a solution of 200 ppm active chlorine for 30 minutes minimum or formaldehyde gas generation method (relative humidity of 60% for 2 hrs)?	✓				See above	
Is the exterior of the fish transport vehicle disinfected using high pressure steam (115-130°C), high temperature acid, or with 200 ppm chlorine for 30 minutes?	✓				See above	
Is the fish transport vehicle (cab) disinfected using 600 ppm quaternary ammonia compounds (1.5 ml of 50% stock solution/liter water)?	✓				See above	
Is other equipment disinfected including fish pumps, nets, egg sorters, waders, boots, rain gear, hoses and other equipment using one of the following solutions? 200 ppm chlorine for 30 minutes 600 ppm quaternary ammonia compound for 30 minutes 200 ppm iodophor solution for 10 minutes	✓				See above	
Do personnel wear protective garments when handling fish eggs or cultural water?	✓				See above	
Do the fish transport truck/chassis and tank/unit receive an inspection and service prior to the release season?	✓				See above	
Is a daily service inspection completed before starting up and leaving for the day?	✓				See above	

Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
	N/A	Yes	?	No		
Transportation facilities						
Does the fish transport unit receive an inspection prior to loading?	✓				Fish released on station	
Does a pre-loading inspection covering tank water level, pumps or aerators, oxygen injection system settings, displacement gauge, and truck loading/hauling density tables checked and reviewed occur prior to loading fish in the transport unit?	✓				See above	
Do hauling criteria include checking the fish 45 minutes to 1 hour after loading?	✓				See above	
When fish are active and systems are functioning properly, is the oxygen concentration reduced and maintained at approximately 8 ppm?	✓				See above	
Is water temperature in the transportation unit maintained within the 42-48 °F range?	✓				See above	
Do fish releasing procedures include the following criteria?					See above	
Releasing the fish at the correct release site or into the correct water body.	✓				See above	
Tempering or the difference between the liberation tank and the target water body should not exceed 10°F.	✓				See above	
The liberation hose should be angled so that fish gently hit the water. Using a tripod is a method of ensuring the hose will stay at the proper angle.	✓				See above	

Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
	N/A	Yes	?	No		
Evaluation practices						
Has the hatchery conducted fishery contribution studies?						
Determine the requirements for evaluating and improving management programs?		✓			Discussion	
Develop guidelines that define the geographical area and identify component stocks (hatchery and/or wild) that comprise the management unit?		✓			Discussion	
Develop guidelines that define if the proper stocks of fish are currently being used?		✓			Discussion	
Determine which management units contribute to a specific fishery and the time periods of those contributions?		✓			Discussion	
Determine the relative contributions of the various management units to a specific fishery over the different time periods?		✓			Discussion	

Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
	N/A	Yes	?	No		
ining practices						
Does the hatchery have a training schedule for its staff?		✓			Review of records/Discussion	
Does each staff member have a personal training plan approved by a supervisor and reviewed annually?		✓			Review of records/Discussion	
Does the hatchery routinely exchange training details between other hatcheries and agencies?		✓			Review of records/Discussion	
Does the hatchery encourage and reward off-duty training of staff?		✓			Review of records/Discussion	
Does the hatchery conduct monthly staff meetings?		✓			Review of records/Discussion	

Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
	N/A	Yes	?	No		
monthly hatchery monitoring visits being conducted by a qualified fish health specialist as described below?						
Conduct visit at least monthly		✓			Review of records/Discussion	
Monitoring conducted by qualified fish health specialist		✓			Review of records/Discussion	
Examine a representative sample of healthy and moribund fish from each lot.		✓			Review of records/Discussion	
Review fish culture practices with hatchery manager.		✓			Review of records/Discussion	
Report finding and results of necropsies on standard form.		✓			Review of records/Discussion	
Recommend appropriate drug or chemical treatment.		✓			Review of records/Discussion	
Summarize fish health status or stock prior to release or transfer to another facility.		✓			Review of records/Discussion	
all of the functions of the hatchery yearly monitoring visits being completed as described below?						
Annually examine each broodstock for the presence of reportable viral pathogens.		✓			Review of records/Discussion	
Annually screen each salmon broodstock for the presence of <i>Renibacterium salmoninarum</i> .		✓			Review of records/Discussion	
Conduct inspection by or under the supervision of qualified fish health specialist.		✓			Review of records/Discussion

Remedial Actions

Based on the compliance status for each performance measure, remedial actions were developed. The required remedial actions are organized into five categories. The types of categories range across a spectrum from those actions that are beyond human control, to those that require a change in agency policy or procedures, to those that involve a significant capital cost to put in place. The following are the five types of remedial actions identified under phase 1 of the audit:

The Five Types of Remedial Actions

Type	Description
1	Non-compliance issues resulting from items beyond human control or Performance Measures not relevant for this hatchery
2	Remedial actions requiring changes in agency policies or procedures
3	Remedial actions requiring changes in monitoring coverage or interval
4	Remedial actions requiring significant capital expenditures
5	Remedial actions that may require significant capital expenditures but are not clearly definable at this time

Remedial Actions at North Toutle Hatchery - Coho (Type S)

This section presents the corrective actions required to bring the North Toutle Hatchery - Coho (Type S) program into compliance with IHOT performance measures. The remedial actions suggested here are just that, suggestions developed by the Montgomery Watson Audit Team. For some non-compliance areas, other remedial actions could be proposed. The required remedial actions are cross-referenced to each IHOT performance measure that was not in compliance. Where appropriate, the costs associated with the remedial actions are also presented (Table 3).

The cost estimates presented in this section are based on professional experience from similar projects. In most cases, only a lump-sum figure is presented, and detailed take-off lists have not been prepared. The cost estimates are essentially order of magnitude estimates ($\pm 40\%$).

More importantly, the suggested remedial activities may also present several levels of action. Optional actions have been listed for several problems. These optional actions are desirable for either operational or safety considerations.

Remedial Action Required	Cost	PMs ¹
Type 4 - Remedial actions requiring significant capital expenditures		
Heat 100 gpm of incubation water by 8 °F; chill 100 gpm of incubation water by 3 °F	\$80,000	5a
Install security alarms	\$10,000	6
Install telephone pagers	\$5,000	6
Install 19,000 sf of new bird netting; replace 128,000 sf of existing bird netting	\$110,000	11
Provide additional 1,800 gpm of flow for raceways	\$40,000	19
Provide flow bypass around adult holding pond to increase flow to earthen pond	\$25,000	19
Type 5 - Remedial actions that may require significant capital expenditures but are not clearly definable at this time		
Increase DO by aeration	----	5b
Construct pollution abatement facility for hatchery	----	14

¹ PMs are performance measures that were extracted from the IHOT 1995 report. The IHOT performance measures are listed in Table 2 (Section 3 of this report) in numerical order.

Hatchery Contribution to Fisheries, Spawning Grounds, and Hatcheries

This section presents the audit findings for the North Toutle Hatchery - Coho (Type S) program contribution of adult fish to fisheries, local fisheries, spawning grounds, and hatcheries. Data is reported by broodyear. A broodyear refers to the adult contribution from the eggs produced from a single group of spawning adults. For some species, this may include fish caught as 2-, 3-, 4-, 5-, and 6-year old fish. Because of the return distribution and data processing delays, the complete adult contribution for a given broodyear may not be available until 4 to 5 years after the fish have been released from the hatchery.

**Table 4. Adult Contribution to Fisheries, Spawning Grounds, and Hatcheries:
North Toutle Hatchery - Coho (Type S)**

Year	Fisheries ¹ (Broodyear)	Spawning Grounds ¹ (Broodyear)	Hatchery ¹ (Broodyear)	Total Combined Contribution ² (Broodyear)	Smolt to Adult Survival (percent)
1981					
1982					
1983					
1984					
1985					
1986					
1987	1,298	0	488	1,786	3.61
1988	1,970	2	577	2549	5.18
1989	102	0	64	166	0.55
1990	396	1	316	713	1.44
1991	17	0	418	435	0.22
1992					

¹ Data obtained from Missing Production Groups Annual Report or from the Regional Mark Information System database.

² Total combined adult contribution; presented when it is not possible to subdivide the contribution into fisheries, spawning grounds, and hatchery contributions.

Annual Operating Expenditures

The level and detail of annual operating expenditures varies widely depending on hatchery, operating agency, and funding source. When provided, expenditures were presented in terms of personnel costs, operating costs (power, feed, supplies), capital costs, indirect costs charged to the federal government, third-party costs, and other costs. These cost components were summed to determine a total hatchery annual cost. Based on discussion with the hatchery manager, the percent of total hatchery costs allocated to a given program was estimated. The total hatchery costs and the percent of hatchery costs allocated to a given program were used to compute the cost of a given program. Table 5 shows the annual operating expenses for the North Toutle Hatchery - Coho (Type S) program. For programs that occur at more than one facility (as shown on Table 1 in Section 3 of this report), the cost breakdown for the component(s) at each facility is presented in separate tables (Table 5a).

Table 5. Annual Operating Expenses: North Toutle Hatchery - Coho (Type S)

Hatchery	1992	1993	1994
1. North Toutle Hatchery	\$225,686	\$207,000	\$167,077
